Ladies and Gentlemen:

Pursuant to the Administrative Rules of Montana, 16.2.604, the following Preliminary Environmental Review has been prepared by the Department of Health and Environmental Sciences concerning Paul and Andy Rosin/dba/Rosin Bros., Inc..

The purpose of the Preliminary Environmental Review is to inform all interested governmental agencies, public groups or individuals of the proposed action and to determine whether or not the action may have a significant effect on the human environment. This Preliminary Environmental Review will be circulated for a period of fifteen (15) days at which time a decision will be made as to our future action.

If you care to comment on this proposed action, please do so within the allotted time.

Sincerely,

Carol Fix

Solid and Hazardous Waste Bureau Environmental Sciences Division Telephone (406) 444-2667

CF/ba Encls.

#### General Comments

The Montana Motor Vehicle Recycling and Disposal Act requires the licensing and screening of motor vehicle wrecking facilities from public view. No junk vehicles or vehicle parts can be visible from any point six feet above the centerline of a public road. A junk vehicle is a dismantled, ruined, wrecked, or discarded motor vehicle that is inoperative and unlicensed.

The applicants, the Rosin Brothers, propose to license an already established recycling facility at 609 E. Aluminum in Butte, MT. The applicants mainly deal in scrap metal; however, they will periodically have crushed vehicles and vehicle parts stored on site.

### Potential Impacts on Physical Environment

#### 5. Aesthetics

The applicants have screened a lot approximately 275' by 700' with a combination of solid sheet metal fencing and a building (see attached diagram). The fence is of sufficient height on all sides so that any junk vehicles or parts stored at the site will be screened from view of all public roads.

Sheet metal fencing, while sometimes considered unattractive, fits in well aesthetically with the surrounding industrial land uses. For this reason, and because the junk vehicle inventory will be screened from public view, DHES considers the potential aesthetic impact from this proposed facility minor.

#### Potential Impacts on Human Environment

3. Local and state tax base and tax revenue

. Quantity and distribution of community and personal income

8. Quantity and distribution of employment

The successful operation of a motor vehicle wrecking facility should have at least a minor impact on any or all of the above criteria.

10. Demands for government services

State and local junk vehicle program officials will routinely inspect the facility to assure its compliance with state law.

13. Locally adopted environmental plans and goals

The establishment and operation of a motor vehicle wrecking facility at the proposed location does not violate any locally adopted land use planning or zoning ordinances as certified on the application by the Butte-Silver Bow Planning Department.
